

**FOR NEW HOT WATER HEATING INSTALLATIONS**

**HYDRO-SEAL+4** quickly seals any leaks that may appear in the system. An application of **HYDRO-SEAL+4** assures trouble-free, efficient operation. It keeps the system free from air pockets and prevents annoying noises and corrosion.

**FOR EXISTING HOT WATER HEATING INSTALLATIONS**

Use **HYDRO-SEAL+4** to correct operating troubles. Eliminates nuisance of bleeding lines by preventing formation of air pockets. Stops annoying circulation noises and assures uniform heat. Prolongs the life of boiler by preventing corrosion.

**DIRECTIONS**

**HYDRO-SEAL+4 IS FOR USE IN HOT WATER HEATING SYSTEMS ONLY. DO NOT USE IN STEAM BOILERS. DO NOT USE WITH SYSTEMS CONTAINING ANTI-FREEZE.**

**AMOUNTS:** Use one quart of **HYDRO-SEAL+4** for each 22 gallons of water in system. One quart is usually sufficient for the average one family house system.

- **SHAKE WELL BEFORE USING**
- For existing systems lower water level below top of boiler.
- Provide opening by removing plug or fitting and add the required amount of **HYDRO-SEAL+4** into new or existing boilers.
- Fill system.
- Keep circulator running for several hours.

In addition to sealing any leaks in the system, an application of **HYDRO-SEAL+4** will assure trouble-free, efficient operation and keep the system free from air pockets and annoying noises. It will prevent corrosion of metal.

**HYDRO-SEAL+4** will provide a durable, long lasting repair of leaks. It will provide protection from air pockets, circulation noises and corrosion for at least two heating seasons. To maintain corrosion protection, it is recommended to treat boiler with **HYDRO-SEAL+4** every two years.

Contains: Silicic acid, sodium salt (C.A.S. #1344-09-8)
