

**Better Performance,
Less Wastewater***

Series 720 Fan-Powered
Evaporative Humidifier

INDUSTRY-LEADING
CAPACITY** | **21 GPD**

Featuring
HydroCore™ TECHNOLOGY

WHY THE 720 HUMIDIFIER

Simple Service

Annual maintenance and service is now easier than ever with a one-piece disposable HydroCore™ and new maintenance-free strainer.

Superior sustainability

HydroCore™ Technology recirculates water for 60% less wastewater* down the drain.

Plus, the HydroCore™ is made with recycled plastic.

Ease of Install

Distribution Tray allows for up to 3 degrees out of level.

Catch All Tray designed to reduce leakage risk.

Install fan on left or right.

Best-In-Class Features

Up to 21 GPD

High speed for maximum output or low speed for reduced noise and minimal capacity impact

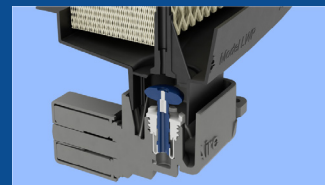

Hybrid Fan

Enhanced airflow for increased output and efficiency

Distribution Tray

Ensures even water flow, accommodating imperfect installations

Recirculation Valve

Recirculation valve minimizes water usage while maintaining optimal panel saturation

Reversible Design

Optimizes performance and accessibility for both horizontal, vertical furnace airflow, and challenging installs.
